Good afternoon:

Please see the attached memo, SWAMP/EDU Worksheets, and Unapproved Water and Sewer Plans for the Enclave at Crofton (formerly known as the Berkshire Property) site. The site will be redirecting a portion of the proposed sewerage flow to the Crofton Pump Station due to existing grades on-site. Please forward any review comments that you may have to my attention at your earliest convenience. Draft comments are due on June 7, 2017, and final comments are due on July 3, 2017.

Thanks a lot,

Marcus Gaskins

Jeff:

The plans show that not all the water and sewer will be going to the Pump Stations. Specifically, Lots 1-6 are connecting to the existing system. Please provide information on whether there was any existing EDUs on-site and another SWAMP worksheet must be provided for the separated EDUs.

Marcus, thanks for the feedback,

As per our conversation, the current swamp and edu worksheet you received will be forwarded onto DPW. (I also attached the plans as requested)

Enclave of Crofton- Total of 83 units (19 townhomes/64 Condo)

Proposed: 14 condos and 6 townhomes gravity connection to prop relocated 24" sewer.

Proposed 50 condos and 13 townhomes gravity connection to existing crofton pump station.

The site has 97 Edu's approved per letter dated 1-28-16.

Again, the entire subdivision's water is connecting to the Existing Public 16" main along rt 3. (this did not change)

You are correct on the Sewer, some is going to the Crofton pump station, via gravity and a portion to the relocated 24" pipe, via gravity. This tie in is still system as approved in our Sketch Plan, just different connection points. I hope I explained this well enough.

If you need forward assistance, please contact Jeff Smith.

Thank you,

Tom Lanyon | Bowman Consulting

Marcus, the easement that runs through the property is for an existing public sanitary sewer line. We will obtain the easements for you, but hope this will not slow down your review. This site has already been approved for Sketch plan. I'm not sure what is going on, but we simply resubmitted plans at the request of Dan Kane and David Braun to indicated the offsite gravity sanitary sewer line. The number on units has decreased from the original approval. Hopefully anything you need clarification with could be pushed until FDP. Thanks-

Jeff Smith, P.E. | Bowman Consulting

Jeff:

The main easement that must be provided is the utility (water) easement along the US-301 (Crain Highway). For the sewer main that traverses through your site, it is common practice to include reference to the existing easement on the plans as to be removed, the easement listed as to be abandoned (as applicable), and existing public manholes labeled as such with their manhole number(s). The related Public Plans appear to be AA County Public Plan Numbers 13564-13565, 9561-9560, 13846, 12184, 8097-8098, 8119-8121, 9553-9554, and 10510; SHA ROW Plats

15446-15447, County Plat Book 33 Page 12.

Good morning:

The Enclave at Crofton is currently under review. Could you provide an updated SWAMP Worksheet and EDU Worksheet for the updated plans? The manhole appears to have changed and we need to know what the new calculations for water and sewer are.
